

Ultrasonic Cavitation

HiLipo Cavi

40 KHz Cavitation

Why Hilipo Cavi

Hi Lipo Cavi is one of the most advance and efficient systems using low-frequency 40KHz ultrasound for easy , painless & non-surgical reduction of localized subcutaneous unwanted fat from the problem areas & treatment of cellulite. Hi Lipo Cavi works by selectively targeting unwanted fat cells in specific problem areas in the adipose tissue and effectively shaking the cell membrane till it ruptures which will then be disposed off by the liver cells and renal besides a good physical activity , without affecting the surrounding tissue , such as nerves or blood cells. The treatment lasts about 30 minutes, it is totally painless and with no known side effects. In most cases the result can be seen immediately and depending on individual clients, most will need between 3 – 7 treatments with intervals of 7 – 10 days. HiLipo Cavi is the true alternative to surgical liposuction.

Features
